

- Just like last sprint, we could have probably made stories smaller in scope and decomposed them into smaller stories so there isn't a rush to finish everything in the last couple of days.
- Since this sprint overlapped with the midterm, we could not do much in the first half of week 1.
- Our sprint velocity hasn't changed from previous sprints and we do not need to adjust it for the future. We all put in consistent effort throughout the sprint and got all our stories done.
